## 1. Nature of Operations and Going Concern

The Company is engaged in the exploration and evaluation of mineral properties in Ontario and Quebec, Canada and has not yet determined whether these properties contain National Instrument 43-101 compliant ore reserves that are economically recoverable. The exploration programs undertaken and proposed constitute an exploratory search and the evaluation of historic resources. There is no assurance that the Company will be successful in its search and evaluation. The business of exploring for minerals and mining involves a high degree of risk. Few properties that are explored are ultimately developed into producing mines. Major expenses may be required to establish ore reserves, to develop metallurgical processes and to construct mining and processing facilities at a particular site. It is impossible to ensure that the current exploration and evaluation programs planned by the Company will result in a profitable commercial mining operation. The amounts shown as exploration and evaluation assets represent net costs to date, less amounts written-off, and do not necessarily represent present or future values. The recovery of the amounts shown for exploration and evaluation assets is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the exploration and evaluation of such a property or properties and ultimately upon future profitable production from a property or properties or the realisation of proceeds from the disposition thereof. The Company has incurred losses since inception and at August 31, 2019 has an accumulated deficit of \$40,595,969 (May 31, 2019 - \$40,443,797).

The Company requires additional funds to continue operations, to explore its mineral properties and to maintain its property interests. Management is actively seeking additional financing and, while it has successfully done this in the past, there is no assurance that it will continue to be able to do so in the future. These matters raise significant doubt about the Company's ability to continue as a going concern. These condensed consolidated interim financial statements do not include adjustments that would be necessary should the Company be unable to continue as a going concern.

The head office, principal address, registered address and records office of the Company are located at 510 – 580 Hornby Street, Vancouver, British Columbia, Canada, V6C 3B6. The Company's shares are traded on the Tier 2 of the TSX Venture Exchange ("TSX-V") under the symbol "IMR.V".

### 2. Significant Accounting Policies

### **Statement of Compliance**

These condensed consolidated interim financial statements of the Company for the period ended August 31, 2019 have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting. The significant accounting policies applied in these condensed consolidated interim financial statements are based on the IFRS issued and outstanding as of August 31, 2019.

### **Basis of Presentation**

These condensed consolidated interim financial statements have been prepared on the basis of accounting policies and methods of computation consistent with those applied in the Company's annual consolidated financial statements for the year ended May 31, 2019. These condensed consolidated interim financial statements have been prepared on a historical basis and have been prepared using the accrual basis of accounting, except cash flow information. These condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise noted.

These condensed consolidated interim financial statements do not include all of the information required for full annual consolidated financial statements and should be read in conjunction with the annual consolidated financial statements of the Company for the year ended May 31, 2019.

## 2. Significant Accounting Policies (cont'd)

#### **Basis of consolidation**

These condensed consolidated interim financial statements include the financial statements of the Company and the entities controlled by the Company. The financial statements of subsidiaries are included in the condensed consolidated interim financial statements from the date that control commences until the date that control ceases. All intercompany transactions and balances have been eliminated. These condensed consolidated interim financial statements include accounts of iMetal Resources Inc. and its wholly-owned subsidiary Risorse Dei Minerali Naturali S.R.L ("RMN"), a company incorporated in the province of Grosseto, Italy.

### Significant Accounting Judgments, Estimates and Assumptions

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities and disclosures of contingent assets and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period.

Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Differences may be material.

#### Fair value of stock options and warrants

The fair value of stock options and brokers' warrants issued are subject to the limitation of the Black-Scholes option pricing model that incorporates market data and involves uncertainty in estimates used by management in the assumptions. Because the Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices, changes in subjective input assumptions can materially affect the fair value estimate.

#### Recovery of deferred tax assets

Judgment is required in determining whether deferred tax assets are recognized in the statement of financial position. Deferred tax assets, including those arising from unutilized tax losses, require management to assess the likelihood that the Company will generate taxable earnings in future periods, in order to utilize recognized deferred tax assets. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the date of the statement of financial position could be impacted.

Additionally, future changes in tax laws in the jurisdictions in which the Company operates could limit the ability of the Company to obtain tax deductions in future periods. The Company has not recorded any deferred tax assets.

## 2. Significant Accounting Policies (cont'd)

### Significant Accounting Judgments, Estimates and Assumptions (cont'd)

### Critical judgments in applying accounting policies:

The following are critical judgments that management has made in the process of applying accounting policies and that have the most significant effect on the amounts recognized in the condensed consolidated interim financial statements:

- the determination that the Company will continue as a going concern for the next year;
- the determination that there have been no events or changes in circumstances that indicate the carrying amount of exploration and evaluation assets may not be recoverable.

## New Accounting Standards Adopted During the Period

### IFRS 16 – Leases

IFRS 16 specifies how an IFRS reporter will recognize, measure, present and disclose leases. The IASB issued IFRS 16, Leases, in January 2016, which replaces the current guidance in IAS 17. Under IAS 17, lessees were required to make a distinction between a finance lease and an operating lease. IFRS 16 requires lessees to recognize a lease liability reflecting future lease payments and a "right-of-use asset" for virtually all lease contracts. The IASB has included an optional exemption for certain short-term leases and leases of low-value assets. IFRS 16 is effective for annual periods beginning on or after January 1, 2019. Earlier adoption is permitted, but only in conjunction with IFRS 15. The Company assessed the impact of IFRS 16 and concluded that it has no affect on the condensed consolidated interim financial statements.

### 9. Capital Management

The Company defines its capital as all components of shareholders' equity. The Company's objectives when managing capital are to safeguard its ability to continue as a going concern.

In order to maintain its capital structure, the Company is dependent on equity funding and when necessary, raises capital through the issuance of equity instruments, primarily comprised of common shares. The Company manages its capital structure and makes adjustments to it in light of economic conditions. The Company, upon approval from its Board of Directors, will make changes to its capital structure as deemed appropriate under the specific circumstances.

The Company is not subject to any externally imposed capital requirements or debt covenants, and does not presently utilize any quantitative measures to monitor its capital. There were no changes to the Company's approach to managing capital during the period.

## **10. Financial Instruments and Financial Risk Factors**

### Financial instruments

Financial instruments must be classified at one of three levels within a fair value hierarchy according to the relative reliability of the inputs used to estimate their values. The three levels of the hierarchy are as follows:

- Level 1: Unadjusted quoted price in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3: Inputs that are not based on observable market data.

The fair value hierarchal classification of the Company's financial instruments measured at fair value for the peirod ended August 31, 2019 and 2018 is as follows:

August 31, 2019	Level 1	Level 2	Level 3	Total
Cash	\$ 169,532	\$ -	\$ -	\$ 169,532
May 31, 2019	Level 1	Level 2	Level 3	Total
Cash	\$ 593,705	\$ -	\$ -	\$ 593,705

Cash is measured using Level 1. The Company does not have any financial instruments that are measured using Level 2 or Level 3 inputs. During the period ended August 31, 2019, there were no transfers between Level 1, Level 2, and Level 3 classified assets and liabilities.

The Company's financial instruments are exposed to certain financial risks, including liquidity risk and foreign exchange risk.

## 10. Financial Instruments and Financial Risk Factors (cont'd)

#### Fair Value

The Company's financial instruments consist of cash, amounts receivable, due from related parties, accounts payable and accrued liabilities, note payable and due to related parties. The fair value of these financial instruments approximates their carrying values due to their short term to maturity. Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

The fair value of cash and marketable securities are based on level 1 inputs of the fair value hierarchy.

#### Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. To the extent that the Company does not believe it has sufficient liquidity to meet obligations, it will consider securing additional equity funding, or engage in negotiations to extend terms with creditors. The Company manages liquidity risk through the management of its capital structure (see Note 9).

### Foreign Exchange Risk

The Company raises its capital in Canadian dollars. The Company holds its cash mainly in Canadian dollars. The Company minimizes its exposure to foreign currency risk by minimizing the amount of funds in currencies other than the Canadian dollar. The Company does not undertake currency hedging activities. The Company continuously monitors its exposure to foreign exchange risk to determine if any mitigation strategies warrant consideration.
